

Improve your home. Get rebates. Save money.

Dear Valued Energy Upgrade Community Member:

The future of Energy Upgrade CA in LA County remains bright following the close of LA County's matching incentives for Basic and Advanced Upgrade Packages. This new era for Energy Upgrade starts today with sizeable incentives (up to \$4,000) continuing into the distant future for homeowners to take advantage of! And don't forget—along with Advanced and Basic Upgrade Packages, homeowners are still able to do Flex Path projects on a first-come, first-served basis.

Our hats are tipped to the many LA County residents who took advantage of Energy Upgrade since its early 2011 launch. The energy savings achieved by those residents equates to over 2,000 megawatt-hours of electricity, the amount of energy needed to power over 169 homes for one year! Needless to say, this is just the beginning for Energy Upgrade CA; imagine how much more energy homeowners can save in the years to come. We hope you will continue to spread the word about Energy Upgrade, take advantage of the generous utility rebates, and help us save enough energy to power 300 homes and beyond!

Along with the rebates and incentives available, LA County's low-interest Energy Loans will continue to be offered to help homeowners pay for their home energy upgrade projects over time. That way, homeowners may enjoy the many benefits of being in a more comfortable, safe, and energy efficient home sooner rather than later. It's a win-win for LA County residents and the environment!

We look forward to continuing our partnership with all of you in this new era of Energy Upgrade. Please help spread the word about the program to your friends, coworkers, family members, and neighbors!

Sincerely,

The Energy Upgrade CA in LA County Team
